# Multiple Sclerosis -- KOL Insight and Consensus Outlook Modules

## Introduction

The multiple sclerosis treatment landscape has undergone dramatic changes over the past year. Biogen's Tecfidera has revolutionised multiple sclerosis treatment in the U.S., eroding significant market share from older therapies. However, patent concerns has stalled Tecfidera's launch in Europe. Genzyme have taken advantage of this delay with Lemtrada's (alemtuzumab) and Aubagio's (teriflunomide) EU approval. The arrival of these drugs is expected to transform multiple sclerosis treatment and be a catalyst for unprecedented market growth.

Over the next five years, the global multiple sclerosis (MS) market is set to grow from \$14.3 billion in 2012 to \$21.5 billion in 2017. Primary drivers of this growth will be the entry of new pipeline therapies, satisfying the unmet needs of convenient administration and more efficacious therapy, and continued uptake of existing therapies.

A Complete Ongoing Analysis of Current Trends, Future Forecasts and Landscape Modifiers

For instant access to an accurate, unbiased, qualitative review of the latest treatment trends along with a five-year quantitative diabetes market forecast look no further than FirstWord's Therapy Trends: Multiple Sclerosis. This comprehensive FirstWord research is available in two comprehensive modules:

Over 450 pharmaceutical news sources
