BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use *How To Buy* information on the last page of this document.

We look forward to being of service to you.

If you have bulk and/or recurring requirements, please get in touch - we can liaise with publishers to obtain sample pages and negotiate discounts on your behalf.

Anesthesia Devices Market by Product (Anesthesia Delivery Machines, Anesthesia Disposables & Accessories, Anesthesia Monitors, and Anesthesia Information Management Systems (AIMS), Type (General and Local), Application (Cardiology, Neurology, Dental, Ophthalmology, Urology, Orthopedics, and Others), and End User (Hospitals, Clinics, and Ambulatory Service Centers): Global Opportunity Analysis and

Anesthesia is a medical procedure that is used to provide sedation to the patients using anesthetics to control pain during the course of a surgery. Anesthesia devices, such as anesthesia delivery machines and disposables, are commonly used during surgical procedures to control pain, breathing, blood pressure, blood flow, and heart rate & rhythm.

The market for anaesthesia devices is expected to witness a significant growth during the forecast period due to advancements in technology, increase in number of surgical procedures globally, and rise in geriatric population, which is highly susceptible to injuries or medical conditions that require surgery. However, the high cost of the anesthesia devices is expected to pose as a major obstacle for the growth of the market. Emerging nations, such as LAMEA and Asia-Pacific, are expected to serve major opportunities to the manufacturers of anesthesia devices propelling the growth of the market during the forecast period.

The report segments the market based on product, type, application, end user, and region. Based on product, it is classified into anesthesia delivery machines, anesthesia disposables & accessories, anesthesia monitors, and anesthesia information management systems (AIMS). The anesthesia disposables & accessories are further divided into anesthesia circuits, anesthesia masks, resuscitators laryngoscopes, flexible intubation scopes, supraglottic airways, ventilator circuits, heat and moisture exchangers (HMEs), and others. By type the market is categorized into general anesthesia and local anesthesia. Based on the application, it is classified into cardiology, neurology, dental, ophthalmology, urology, orthopedics, and others. Based on end user, the market is divided into hospitals, ambulatory service centers, and clinics. Geographically, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

KEY MARKET BENEFITS

The study provides an in-depth analysis of the market with current trends and future estimations to elucidate the imminent investment pockets.

It offers a quantitative analysis from 2017 to 2023, which is expected to enable the stakeholders to capitalize on prevailing market opportunities.

Extensive analysis by product elucidates the various types of anesthesia devices used for diverse surgical procedures

Comprehensive analysis of all geographical regions is provided to determine the prevailing opportunities.

Key players are profiled and their strategies are analyzed thoroughly, which helps to understand the competitive outlook of the global market.
