Kidney Function Tests - Global Market Outlook (2017-2023)

According to Stratistics MRC, the Global Kidney Function Tests market is expected to grow from $1.23 billion in 2016 to reach $1.96 billion by 2023 with a CAGR of 6.9%. Growing incidence of kidney diseases, raising global geriatric population, and increasing prevalence of diabetes are some of the factors fostering the market growth. In addition, increasing health care awareness, technological advancements are some other factors propelling the market growth. On the other hand, strict regulations on product approvals, high costs for treatment are the restraints inhibiting the market growth.

Regular health check-ups for diabetic patients to monitor their kidney function are causing higher demand for Test Type. There are broad ranges of test type available in the market such as dilution & concentration tests, clearance tests, urine tests, imaging tests, and visual imaging tests. In this, clearance tests are famous for its cost efficiency, and accurate test results. Growing government initiatives towards healthcare is assisting hospitals to adopt the tests.

North America is estimated to be the dominant one among all, due to developed healthcare infrastructure, government initiatives towards public health care that are expected to drive this dominance. Asia Pacific region is predicted to grow at higher CAGR during the forecast period. The growth is attributed to rise in medical tourism market, increase in prevalence of kidney function disease in countries such as Japan, China, and India are favoring the Asia Pacific market growth.
