Physician Views: How do neurologists value multiple sclerosis medical affairs teams – what could they be doing better?

BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use *How To Buy* information on the last page of this document.

We look forward to being of service to you.

If you have bulk and/or recurring requirements, please get in touch - we can liaise with publishers to obtain sample pages and negotiate discounts on your behalf.

Physician Views: How do neurologists value multiple sclerosis medical affairs teams – what could they be doing better?

Scope

Medical affairs teams are playing an increasingly critical role for pharmaceutical manufacturers. They are in a prime position to navigate the industry's continued transition from merely selling drugs to playing an integral role in the efficient workings of healthcare systems. Not only do medical affairs personnel sit at an interface between the R&D and commercial spheres, but represent the voice of the company in communication with a growing range of stakeholders.

As with other stakeholders, pharma's relationship and means of communication with physicians has evolved significantly in recent years, with medical affairs teams playing a pivotal role in this shift. As the role of the typical sales representative has diminished, medical affairs personnel have emerged, largely in response to regulatory changes that require a clear firewall between promotional and non-promotional activities.

With the role of medical affairs largely defined by their non-promotional duties (thought leader management, medical science liaison, medical education and information, clinical research operations and outcomes studies, for example) and interaction with a large number of stakeholders, pharma has endured some difficulties in measuring the success and value of these teams.

Purchase Reasons

FirstWord's latest Physician Views poll seeks to gain some insight into how neurologists value the role that medical affairs personnel in the multiple sclerosis market play. Specifically we asked US and EU5-based doctors:

What areas they think pharmaceutical company medical affairs teams must focus on in order to deliver better service to physicians
Additional Details
Publisher : FirstWord Pharma

Reference :

Number of Pages : 0

Report Format : PDF

Publisher Information :

The advertisement features a background image of a scientist in a laboratory setting, wearing safety glasses and blue gloves, working with test tubes and a pipette. In the foreground, a report cover is displayed, featuring the 'FirstWord' logo and the BioPortfolio branding. The report cover text includes 'BioPortfolio Life Science Healthcare and Pharmaceutical Global Market Research and Corporate Data'. To the right of the report cover, the BioPortfolio logo is prominently displayed in large blue letters, followed by the tagline 'Life Science Healthcare and Pharmaceutical Market Research and Corporate Data' in smaller blue text. Below this, the phrase 'Best Prices Guaranteed' is written in bold red letters, and the website address 'bioportfolio.co.uk' is shown in large blue letters.
