Glaucoma - 5EU Drug Forecast and Market Analysis to 2023
Glaucoma - 5EU Drug Forecast and Market Analysis to 2023

BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use How To Buy information on the last page of this document.

**We look forward to being of service to you.**

If you have bulk and/or recurring requirements, please get in touch - we can liaise with publishers to obtain sample pages and negotiate discounts on your behalf.

Glaucoma - 5EU Drug Forecast and Market Analysis to 2023

Summary

Glaucoma is a leading cause of preventable blindness globally. This chronic progressive optic neuropathy causes irreversible vision loss through damage to the optic nerve. There are currently no treatments that can directly prevent this damage, and all commercially available glaucoma therapies focus on lowering elevated intraocular pressure (IOP), a known risk factor for glaucoma development and progression. The launch of fixed-dose combination (FDC) products, which combine drugs from these various classes, will continue to be a source of significant growth in this market. The glaucoma market is about to enter a phase of new growth with the arrival of first-in-class drugs, such as Aerie’s Rhopressa, Bausch & Lomb’s Vesneo (latanoprost bunod), and Inotek’s trabodenoson into the 7MM during the forecast period, which will generate additional growth in the global glaucoma market.

GlobalData estimates that drug sales for glaucoma in the 5EU reached $250m during the base year of 2013. After an initial period of minimal growth, GlobalData anticipates a moderate and steady growth trend from 2015 onwards. This can be partially attributed to the expected arrival of the recently approved FDC products Simbrinza and Taptiqom during 2015, and to the expected launch of five pipeline products during the forecast period.

*This is an on-demand report and will be delivered within 24 hrs. (excluding weekends) of the purchase.

Scope

- Overview of Glaucoma including epidemiology, etiology, symptoms, diagnosis, pathology and treatment guidelines as well as an overview on the competitive landscape.
- Detailed information on the key drugs in 5EU including product description, safety and efficacy profiles as well as a SWOT analysis.
- Sales forecast for the top drugs in 5EU from 2013-2023.
- Analysis of the impact of key events as well the drivers and restraints affecting 5EU Glaucoma market.

Reasons to buy

- Understand and capitalize by identifying products that are most likely to ensure a robust return
- Stay ahead of the competition by understanding the changing competitive landscape for Glaucoma.
- Effectively plan your M&A and partnership strategies by identifying drugs with the most promising sales potential
- Make more informed business decisions from insightful and in-depth analysis of drug performance
