Home Health Hub Market by Product & Service (Standalone Hub, Mobile Hub, Remote Patient Monitoring Service), Type of Patient Monitoring (High, Moderate, and Low Acuity), End User (Hospital, Payers, Home Care Agency) - Global Forecast to 2023

BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use *How To Buy* information on the last page of this document.

We look forward to being of service to you.

If you have bulk and/or recurring requirements, please get in touch - we can liaise with publishers to obtain sample pages and negotiate discounts on your behalf.

Home Health Hub Market by Product & Service (Standalone Hub, Mobile Hub, Remote Patient Monitoring Service), Type of Patient Monitoring (High, Moderate, and Low Acuity), End User (Hospital, Payers, Home Care Agency) - Global Forecast to 2023

“The global home health hubs market projected to grow at a CAGR of 31.2%.”

The home health hubs market is expected to reach USD 848.2 million by 2023 from USD 218.5 million in 2018, at a CAGR of 31.2%.

Factors such as the rising geriatric population and the subsequent increase in the prevalence of chronic diseases, growing need to reduce healthcare costs while improving patient outcomes, and shortage of healthcare professionals are driving the growth of the home health hubs market. However, the security and privacy concerns associated with these devices are expected to restrain the growth of this market to a certain extent.

“The smartphone-based hubs segment is expected to register the highest CAGR during the forecast period.”

On the basis of product and service, the home health hubs market is segmented into standalone hubs, smartphone-based hubs, and home health hub services. The smartphone-based hubs segment is expected to register the highest CAGR during the forecast period. The rapid growth in the smartphone industry, increasing utilization of mobile platforms to improve the accessibility to patient information, rising awareness about smartphone-based health applications, and the growing adoption of smartphone-enabled home health hubs are the major factors driving the growth of this segment.

“The home care agencies segment is expected to grow at the highest CAGR from 2018 to 2023.”

Based on end user, the home health hubs market is segmented into hospitals, healthcare payers, home care agencies, and nursing homes & assisted living facilities. The home care agencies segment is expected to register the highest CAGR during the forecast period. The high growth in this segment is primarily attributed to the increasing reliance of patients on telehealth solutions, such as remote monitoring via phones and the Internet to manage their health conditions. Governments in a number of countries are implementing various initiatives to promote home healthcare, which is also expected to further drive the growth of home care agencies segment in the coming years.

“Asia Pacific is projected to witness the highest growth during the forecast period.”

North America held the largest share of the global home health hubs market in 2017. On the other hand, The Asia Pacific market is expected to grow at the highest rate owing to the growing per capita income, increasing health awareness, growing demand for remote patient monitoring and better healthcare services, and increasing penetration of smartphones in several APAC countries.

Break of primary participants was as mentioned below:

- By Company Type - Tier 1-21%, Tier 2-45% and Tier 3-34%
- By Designation - C-level-39%, Director Level-32%, Others-29%
- By Region - North America-47%, Europe-29%, Asia Pacific-14%, Rest of the World-10%

Prominent players in this market are Qualcomm (US), Honeywell (US), Vivify (US), Lamprey Networks (US), AMC Health (US), iHealth Lab (US), IDEAL LIFE (US), Hicare (US), MedM (US), and OnKöl (US).

Research Coverage:

The report analyzes the various home health hubs and their adoption patterns. It aims at estimating the market size and future growth potential of the global home health hubs market for different segments such as product and service, type of patient monitoring, end user, and region. The report also includes an in-depth competitive analysis of key players in this market along with their company profiles, product offerings, recent developments, and key market strategies.

Reasons to Buy the Report

The report will enrich established firms as well as new entrants/smaller firms to gauge the pulse of the market. Firms purchasing the report could use one or any combination of the below-mentioned five strategies for strengthening the market, which in turn could help them garner a greater market share.

This report provides insights on the following pointers:

- **Market Penetration:** Comprehensive information on product portfolios offered by the top players in the global home health hubs market. The report analyzes the global home health hubs market by product and service, type of patient monitoring, end user, and region.
- **Product Development/Innovation:** Detailed insights on upcoming trends and product launches in the global home health hubs market
- **Market Development:** Comprehensive information on the lucrative emerging regions by product and service
- **Market Diversification:** Exhaustive information about new products, growing geographies, and recent developments in the global home health hubs market
- **Competitive Assessment:** In-depth assessment of market shares, growth strategies, and products of leading players in the global home health hubs market
