Cytotoxic T Lymphocyte Protein 4 (Cytotoxic T Lymphocyte Associated Antigen 4 or CD152 or CTLA4) - Pipeline Review, H2 2018

Summary

Cytotoxic T Lymphocyte Protein 4 (Cytotoxic T Lymphocyte Associated Antigen 4 or CD152 or CTLA4) - CTLA4 also known as CD152 is a protein receptor found on the surface of T cells. It functions as an immune checkpoint and down regulates the immune system. The affinity of CTLA4 for its natural B7 family ligands, CD80 and CD86, is considerably stronger than the affinity of their cognate stimulatory co-receptor CD28. Inhibition of receptor acts as a major negative regulator of T-cell responses.

Cytotoxic T Lymphocyte Protein 4 (Cytotoxic T Lymphocyte Associated Antigen 4 or CD152 or CTLA4) pipeline Target constitutes close to 52 molecules. Out of which approximately 51 molecules are developed by companies and remaining by the universities/institutes. The molecules developed by companies in Pre-Registration, Phase III, Phase II, Phase I, IND/CTA Filed, Preclinical and Discovery stages are 1, 3, 5, 10, 1, 23 and 8 respectively.
