Abbott Diagnostics - Product Pipeline Analysis, 2018 Update

Summary

Abbott Diagnostics, a subsidiary of Abbott Laboratories, is a manufacturer of in vitro diagnostic systems and tests. The company offers core laboratory products, molecular point of care products, transfusion medicine, professional services and diagnostics portfolio. Its products include laboratory systems for automation; molecular diagnostic systems; and point of care systems for blood analysis. Its products find application in therapeutic drug monitoring, measurement of antibodies and antigens, and screening and diagnosis of cancer. It serves blood banks, hospitals, commercial laboratories, government agencies, patient care testing sites, and plasma protein therapeutic companies. The company markets its products through Abbott-owned distribution centers, public warehouses and third-party distributors. Abbott Diagnostics is headquartered in Lake Forest, Illinois, the US.

This report is a source for data, analysis, and actionable intelligence on the company's portfolio of pipeline products. The report provides key information about the company, its major products and brands.

The report enhances decision making capabilities and help to create effective counter strategies to gain competitive advantage.

Scope:

- The report reviews detailed company profile with information on business description, key company facts, major products and services, key competitors, key employees, locations and subsidiaries and recent developments
- The report analyzes all pipeline products in development for the company Abbott Diagnostics
- The report provides pipeline analysis on all pipeline products of the company (by equipment type, by indication, by development stage, and by trial status)
- The report covers detailed information on each pipeline product with information on pipeline territory, stage of development, device class, regulatory path, indication(s), application(s) and estimated launch date
- The report provides detailed description of products in development, technical specification and functions
- The report also covers ongoing clinical trials (wherever applicable) with information on trial name, trial objective, sponsor, trial design , trial status and phase, estimated start and end date.

Reasons to Buy:

- Develop business strategies by understanding the trends and developments driving the medical devices pipeline and technology landscape
- Design and develop your product development, marketing and sales strategies by understanding the competitor portfolio
- To formulate effective Research & Development strategies

- Develop market-entry and market expansion strategies
