Arrhythmias - Pipeline Review, H1 2019
Arrhythmias - Pipeline Review, H1 2019

BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use How To Buy information on the last page of this document.

We look forward to being of service to you.

If you have bulk and/or recurring requirements, please get in touch - we can liaise with publishers to obtain sample pages and negotiate discounts on your behalf.

Arrhythmias - Pipeline Review, H1 2019

Summary

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Arrhythmias - Pipeline Review, H1 2019, provides an overview of the Arrhythmias (Cardiovascular) pipeline landscape.

An arrhythmia is a problem with the rate or rhythm of the heartbeat. During an arrhythmia, the heart can beat too fast, too slow, or with an irregular rhythm. Signs and symptoms include anxiety, weakness, dizziness, and light-headedness, fainting or nearly fainting, sweating, shortness of breath and chest pain. Treatment includes anti-arrhythmics and anticoagulants.

Report Highlights

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Arrhythmias - Pipeline Review, H1 2019, provides comprehensive information on the therapeutics under development for Arrhythmias (Cardiovascular), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Arrhythmias (Cardiovascular) pipeline guide also reviews of key players involved in therapeutic development for Arrhythmias and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies /Universities /Institutes, the molecules developed by Companies in Phase I, Preclinical and Discovery stages are 1, 11 and 2 respectively. Similarly, the Universities portfolio in Preclinical and Discovery stages comprises 3 and 1 molecules, respectively.

Arrhythmias (Cardiovascular) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content / sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

Scope

- The pipeline guide provides a snapshot of the global therapeutic landscape of Arrhythmias (Cardiovascular).
- The pipeline guide reviews pipeline therapeutics for Arrhythmias (Cardiovascular) by companies and universities/research institutes based on information derived from company and industry-specific sources.
- The pipeline guide covers pipeline products based on several stages of development ranging from pre-
registration till discovery and undisclosed stages.

- The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.

- The pipeline guide reviews key companies involved in Arrhythmias (Cardiovascular) therapeutics and enlists all their major and minor projects.

- The pipeline guide evaluates Arrhythmias (Cardiovascular) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.

- The pipeline guide encapsulates all the dormant and discontinued pipeline projects.

- The pipeline guide reviews latest news related to pipeline therapeutics for Arrhythmias (Cardiovascular)

Reasons to buy

- Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.

- Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.

- Find and recognize significant and varied types of therapeutics under development for Arrhythmias (Cardiovascular).

- Classify potential new clients or partners in the target demographic.

- Develop tactical initiatives by understanding the focus areas of leading companies.

- Plan mergers and acquisitions meritoriously by identifying key players and it’s most promising pipeline therapeutics.

- Formulate corrective measures for pipeline projects by understanding Arrhythmias (Cardiovascular) pipeline depth and focus of Indication therapeutics.

- Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.

- Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.
