Cholera Vaccines Market, By products (Dukoral, Shanchol, Vaxchora and others), And Geography (North America, Europe, Asia Pacific, And Rest Of The World) – Analysis, Share, Trends, Size, & Forecast From 2016 – 2027- COVID- 19 Updated

The cholera vaccines market is estimated to represent a global market of USD 82.3 million by 2021-2019 with growth rate of 10.3%.

Cholera is a bacterial infection (*Vibrio cholerae*), primarily caused due to the contaminated food or water intake. Symptoms of it can be mild i.e. watery diarrhea and profuse vomiting, but it can lead to be severe. Normally, patients are treated with oral rehydration solution and in severe condition intake of intravenous fluid is required.

The market is divided into products such as Dukoral, Shanchol, Vaxchora and others. Dukoral, and Shanchol dominated the market. WHO has pre-qualified these two cholera vaccines which will support the market growth. Dukoral was the first oral cholera vaccine to get approval in European Union (EU) during the year 2004.

COVID-19 Impact & Recovery Analysis

The proposed report from AnalystView Market Insights suggests three possible forecast scenarios (probable, optimistic, and pessimistic) considering the COVID-19 impact. Our ongoing research analysis amplifies our framework to ensure the inclusion of underlying COVID-19 crisis impact and potential paths forward. The designed report is delivering detailed insights on COVID-19 considering the changes in consumer demand, purchasing patterns, re-routing of the supply chain, and the significant interventions of governments. The updated study provides insights, and forecast, considering the COVID-19 impact on the market.

Geographically, North America and Europe recorded highest revenue of the total market. Of which, Europe dominated the market with more than USD 210 million revenue in 2016. Developing regions such as Asia Pacific and Latin America are considered to be the fastest growing regional segment owing to the high cholera incidences. For instance, as per the World Health Organization (WHO) statistics cholera spread very rapidly in Latin America which cause nearly 400,000 reported cases and over 4000 reported deaths every year. This fact would in turn boost the demand for cholera vaccines in developing regions, leading to drive the market growth.

Companies such as Merck & Co., GlaxoSmithKline, Sanofi and Pfizer, Inc. are the key players of the market. Collectively these companies accounted for more than 75% revenue share of the global market. Additionally, Novartis AG, Astellas Pharma, Emergent BioSolutions, Takeda Pharmaceuticals, AstraZeneca plc and Mitsubishi Tanabe have also significant presence in this market.

The market size and forecast for each segment has been provided for the period 2016 to 2027, considering 2019 as the base year. The report also provides the compounded annual growth rate (% CAGR) for the forecast period 2021 to 2027 for every reported segment.

The years considered for the study are:

Historical Year – 2016 to 2018

Base Year – 2019

Estimated Year – 2020

Projected Year – 2027

The proposed reports analyse and evaluates the COVID-19 impact, and anticipated change on the future market scenario on this industry, by taking into the account the economic, political, technological, and social, parameters.

The scope of this report covers the market by its major segments, which include as follows:

GLOBAL CHOLERA VACCINES MARKET, BY PRODUCTS

Dukoral

Shanchol

Vaxchora

Others

GLOBAL CHOLERA VACCINES MARKET, BY REGION

North America

Europe

Asia Pacific

Middle East and Africa

Latin America

Publisher Information :

AnalystView Market Insights is a market research and consulting firm that adopts a proactive approach to provide the diverse need for accurate and precise market research, custom research, and consulting solutions across geographies and industry verticals. Our company is led by a team of passionate, naturally curious, and strategic thinkers from different industry backgrounds.

These experts are dedicated to creating concrete market data analysis in various industries such as Healthcare, Bulk Chemicals, Semiconductors and Electronics, Foods and Beverages. We strive to develop meaningful and evidence-based research data that helps our clients, empowering organizations and brands of all sizes with strategic analysis, accurate data, and consumer trends.

We aim to be the number one choice for various clients who require credible data to make vital business decisions. We wish to be a trusted and reliable analytics partner to major business organizations.

We understand that critical business decisions can be taken only when verified, authentic information is available. Therefore, our experts work meticulously to provide our clients with the accurate data, so that they need not spend time in verifying it.

It is also our goal to help our clients ignore traditional research methods that require a large amount of capital, manpower, and most important of it all - the time. We know that these factors are precious to a company and always follow the latest research techniques that produce the required result in a short span of time.
