REPORT HIGHLIGHT

Immunohistochemistry market was valued at USD 1.77 billion by 2019, growing with 7.3% CAGR during the forecast period, 2020-2026

Market Dynamics

The introduction of novel technologically advanced immunohistochemistry solutions, growing prevalence of chronic diseases, and an increase in drug discovery are some of the major factors driving the growth of global immunohistochemistry market. In addition, growing healthcare expenditure and rising geriatric population are other factors fuelling market growth. According to statistics provided by the World Health Organization (WHO), the geriatric population all across the globe is estimated to reach around 2 billion by the end of 2050. Furthermore, increasing demand for personalized medicine and rapid growth in the emerging economies across Latin America and APAC are likely to create lucrative opportunities in the overall market during the forecast period. However, high setup costs and lack of specificity associated with immunohistochemistry techniques are expected to hinder the market growth in the coming future.

The antibodies segment accounted for the majority of share in the market in 2019 and is estimated to grow at a healthy rate during the forecast period. This is majorly owing to their extensive usage in immunohistochemistry procedures for drug testing and disease diagnosis. Antibody-related products such as antibody-drug conjugates, Fc-fusion proteins, & anti-body fragments and therapeutic monoclonal antibodies have become the chief product class in the overall market. Along with antibodies, the kit segment is projected to grow at the fastest pace by 2030 owing to the convenience and the compact nature offered by them. In addition, the kits used in immunohistochemistry consist of numerous products that are customized to fit the needs of the clinicians.

The diagnostics segment registered for the largest share in the industry in 2019 and is projected to experience a lucrative growth rate in the projected timeframe. The growth of this segment is attributed to the increase in the prevalence of chronic diseases and the increasing demand for an accurate diagnosis. Moreover, the increasing research & developments by pharmaceutical companies for novel drug development and discovery is estimated to raise demand for immunohistochemistry solutions. The PhRMA (Pharmaceutical Research & Manufacturers of America) invested around USD 79.6 billion in 2018 for the development and discovery of novel medicines.

Hospitals and diagnostic laboratories accounted for majority market share in 2019 majorly due to an increase in the incidence of chronic diseases coupled with the growing demand for disease diagnosis. Besides, technological advancements such as digital pathology and automated sample preparation have added considerable value. In addition, the growth in the number of clinical research laboratories and hospitals has also surged the demand for diagnostics, thereby boosting the segmental growth.

The North America region is estimated to hold a dominant position in terms of revenue and is anticipated to

continue to lead the immunohistochemistry market during the period of forecast. The dominance of this region is attributed to the presence of well-established healthcare infrastructure coupled with the increasing adoption of immunohistochemistry in diagnostic centres and laboratories. The Asia Pacific market for immunohistochemistry is projected to witness the highest growth due to rapid economic development in emerging countries such as India, China, Singapore, and South Korea. In addition, the high prevalence of chronic diseases and a rapidly aging population are also anticipated to be prominent factors propelling the regional market growth.

Key players of the market include:

- Merck KGaA
- F. Hoffmann-La Roche Ltd.
- Danaher Corporation
- Agilent Technologies, Inc.
- Thermo Fisher Scientific, Inc.
- Bio SB
- Bio-Rad Laboratories, Inc.
- Perkinelmer, Inc.
- Cell Signaling Technology, Inc.
- Abcam plc

The market size and forecast for each segment and sub-segments has been considered as below:

- Historical Year – 2015 to 2018
- Base Year – 2019
- Estimated Year – 2020
- Projected Year – 2026

TARGET AUDIENCE

- Traders, Distributors, and Suppliers
- Manufacturers
- Government and Regional Agencies
- Research Organizations
- Consultants
- Distributors

SCOPE OF THE REPORT

The scope of this report covers the market by its major segments, which include as follows:

GLOBAL IMMUNOHISTOCHEMISTRY MARKET, BY PRODUCT

- Kits

- Reagents

- o Fixation Reagents

- o Stabilizers

- o Organic Solvents

- o Proteolytic Enzymes

- o Histological Stains

- o Blocking Sera and Reagents

- o Chromogenic Substrates

- o Diluents

- Antibodies

- o Primary Antibodies

- o Secondary Antibodies

- Equipment

- o Tissue Processing Systems

- o Slide Scanners

- o Slide Staining Systems

- o Tissue Microarrays

- o Others

GLOBAL IMMUNOHISTOCHEMISTRY MARKET, BY APPLICATION

- Diagnostics

- o Diabetes Mellitus

- o Cardiovascular Diseases

- o Autoimmune Diseases

- o Cancer

- o Infectious Diseases

- o Nephrological Diseases

- Brain & Neurology

- Drug Testing

- Ophthalmology

- Others

GLOBAL IMMUNOHISTOCHEMISTRY MARKET, BY END USE

- Research Institutes
- Hospitals
- Diagnostic Laboratories
- Others

GLOBAL IMMUNOHISTOCHEMISTRY MARKET, BY REGION

- North America
 - o The U.S.
 - o Canada
- Europe
 - o Germany
 - o France
 - o Italy
 - o Spain
 - o United Kingdom
 - o Rest of Europe
- Asia Pacific
 - o India
 - o China
 - o South Korea

AnalystView Market Insights is a market research and consulting firm that adopts a proactive approach to provide the diverse need for accurate and precise market research, custom research, and consulting solutions across geographies and industry verticals. Our company is led by a team of passionate, naturally curious, and strategic thinkers from different industry backgrounds.

These experts are dedicated to creating concrete market data analysis in various industries such as Healthcare, Bulk Chemicals, Semiconductors and Electronics, Foods and Beverages. We strive to develop meaningful and evidence-based research data that helps our clients, empowering organizations and brands of all sizes with strategic analysis, accurate data, and consumer trends.

We aim to be the number one choice for various clients who require credible data to make vital business decisions. We wish to be a trusted and reliable analytics partner to major business organizations.

We understand that critical business decisions can be taken only when verified, authentic information is available. Therefore, our experts work meticulously to provide our clients with the accurate data, so that they need not spend time in verifying it.

It is also our goal to help our clients ignore traditional research methods that require a large amount of capital, manpower, and most important of it all – the time. We know that these factors are precious to a company and always follow the latest research techniques that produce the required result in a short span of time.
