In-vitro Toxicology Testing Market, By Technology (Cell Culture, Molecular Imaging, High Throughput, OMICS Technology), By Method (Cellular Assay, In Silico, Biochemical Assay, Ex-vivo), By Application (Systemic Toxicology, Endocrine Disruption, Dermal Toxicity, Ocular Toxicity), By End Use, and By Geography (NA, EU, APAC, LATAM and MEA) – Analysis, Share, Trends, Size, & Forecast from 2020 –

BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use *How To Buy* information on the last page of this document.

We look forward to being of service to you.

If you have bulk and/or recurring requirements, please get in touch - we can liaise with publishers to obtain sample pages and negotiate discounts on your behalf.

In-vitro Toxicology Testing Market, By Technology (Cell Culture, Molecular Imaging, High Throughput, OMICS Technology), By Method (Cellular Assay, In Silico, Biochemical Assay, Ex-vivo), By Application (Systemic Toxicology, Endocrine Disruption, Dermal Toxicity, Ocular Toxicity), By End Use, and By Geography (NA, EU, APAC, LATAM and MEA) – Analysis, Share, Trends, Size, & Forecast from 2020 –

REPORT HIGHLIGHT

In-vitro Toxicology Testing market was valued at USD 8.23 billion by 2019, growing with 9.1% CAGR during the forecast period, 2020-2026

Market Dynamics

The rise in the number of research & development activities for in-vitro testing, growing awareness regarding the environmental concerns, and ban on animal testing are the major factors driving the growth of global in-vitro toxicology testing market. In addition, increasing ethical concerns related to animal testing procedures coupled with efforts taken by various animal welfare organizations are paving way for the reduction or replacement of animal testing with in-vitro toxicology testing. For example, the U.S. EPA (Environmental Protection Agency) presented a draft policy in 2018 that proposes the usage of in vitro methods to minimize the use of animal in testing chemicals that cause skin sensitization or inflammation.

Furthermore, the emergence of novel approaches of 3D cell culture and advancements in genetic screening and genetics approaches are likely to create lucrative opportunities in the overall market during the forecast period. Conversely, the predictive ability of in-vitro testing as compared to vivo testing and insufficient in-vitro models to determine autoimmunity & immune-stimulation is predicted to hamper the market growth in the coming future.

Regional Takeaways

Presently, Europe region is playing a dominant role in the global market for in-vitro toxicology testing owing to the technological advancements, increasing consciousness related to the significance of a healthy lifestyle, and growing geriatric population in the region.

The Asia-Pacific market for in-vitro toxicology testing is anticipated to witness the fastest growth rate during the period of forecast. The rapid growth of this region is majorly due to the rising focus of government organizations to encourage in-vitro methods' toxicology testing. Additionally, the clinical trials conducted in Asian countries is cost-effective as compared to western countries.

Further key findings of the study include:

- The cell culture technology segment subjugated the market in 2019 and is projected to continue its dominance throughout the forecast. This is majorly because the cell culture serves as an excellent model for exploration of toxic effects by providing consistent samples as well as reproducible results. This allows early-stage finding of toxicity in the drug development procedure.
- The cellular assay method accounted for the majority of market share in 2019 and is expected to grow at a

healthy CAGR during the forecast period. This growth is majorly because of the availability of cellular assay at a broader level for pharmacokinetic reporting of drug products. Besides, several biotechnological and pharmaceutical companies are essentially reliant on cellular assays for early stages of drug development in toxicity screening.

- The systemic toxicology held the largest market share in terms of revenue in 2019 and is projected to subjugate the global in-vitro toxicology testing market during the forecast period. This is attributed to the development of multiple organ plate coupled with simulated blood flow for measuring systemic toxicity.
- The usage of IVTT is highest in the pharmaceutical industry primarily owing to the increase in demand for biopharmaceuticals and the wider usage of toxicology testing mainly in the pharmacokinetic analysis of the generic, novel, and modified pharmaceutical products.
- Key market players operating in the industry include Merck KGaA, Bio-Rad Laboratories, Inc., Charles River, Abbott, Catalent, Inc., Thermo Fisher Scientific Inc., GE Healthcare, Eurofins Scientific, Quest Diagnostics Incorporated, Evotec, and Laboratory Corporation of America Holdings.

The market size and forecast for each segment and sub-segments has been considered as below:

- Historical Year - 2015 to 2018
- Base Year - 2019
- Estimated Year - 2020
- Projected Year - 2026

TARGET AUDIENCE

- Traders, Distributors, and Suppliers
- Manufacturers
- Government and Regional Agencies
- Research Organizations
- Consultants
- Distributors

SCOPE OF THE REPORT

The scope of this report covers the market by its major segments, which include as follows:

GLOBAL IN-VITRO TOXICOLOGY TESTING MARKET, BY TECHNOLOGY

- Cell Culture Technology
- High Throughput Technology
- Molecular Imaging
- OMICS Technology

GLOBAL IN-VITRO TOXICOLOGY TESTING MARKET, BY METHOD

- Cellular Assay
- Ex-vivo

□ Biochemical Assay

□ In Silico

□ Others

GLOBAL IN-VITRO TOXICOLOGY TESTING MARKET, BY APPLICATION

□ Dermal Toxicity

□ Endocrine Disruption

□ Systemic Toxicology

□ Ocular Toxicity

□ Others

GLOBAL IN-VITRO TOXICOLOGY TESTING MARKET, BY END USE

□ Food Industry

□ Pharmaceutical Industry

□ Chemicals Industry

□ Cosmetics & Household Products

□ Diagnostics

□ Others

GLOBAL IN-VITRO TOXICOLOGY TESTING MARKET, BY REGION

□ North America

o The U.S.

o Canada

□ Europe

o Germany

o France

o Italy

o Spain

o United Kingdom

o Rest of Europe

□ Asia Pacific

o India

o China

o South Korea

- o Japan
- o Singapore
- o Rest of APAC
- Latin America
 - o Brazil
 - o Mexico
 - o Argentina
 - o Rest of LATAM
- Middle East and Africa
 - o Saudi Arabia
 - o United Arab Emirates
 - o Rest of MEA

Publisher Information :

AnalystView Market Insights is a market research and consulting firm that adopts a proactive approach to provide the diverse need for accurate and precise market research, custom research, and consulting solutions across geographies and industry verticals. Our company is led by a team of passionate, naturally curious, and strategic thinkers from different industry backgrounds.

These experts are dedicated to creating concrete market data analysis in various industries such as Healthcare, Bulk Chemicals, Semiconductors and Electronics, Foods and Beverages. We strive to develop meaningful and evidence-based research data that helps our clients, empowering organizations and brands of all sizes with strategic analysis, accurate data, and consumer trends.

We aim to be the number one choice for various clients who require credible data to make vital business decisions. We wish to be a trusted and reliable analytics partner to major business organizations.

We understand that critical business decisions can be taken only when verified, authentic information is available. Therefore, our experts work meticulously to provide our clients with the accurate data, so that they need not spend time in verifying it.

It is also our goal to help our clients ignore traditional research methods that require a large amount of capital, manpower, and most important of it all – the time. We know that these factors are precious to a company and always follow the latest research techniques that produce the required result in a short span of time.

Table Of Contents for In-vitro Toxicology Testing Market, By Technology (Cell Culture, Molecular Imaging, High Throughput, OMICS Technology), By Method (Cellular Assay, In Silico, Biochemical Assay, Ex-vivo), By Application (Systemic Toxicology, Endocrine Disruption, Dermal Toxicity, Ocular Toxicity), By End Use, and By Geography (NA, EU, APAC, LATAM and MEA) – Analysis, Share, Trends, Size, & Forecast from 2020 –
