# Competitor Analysis: TGF-? Inhibitors for Modulation of the Tumor Microenvironment

BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use *How To Buy* information on the last page of this document.

***We look forward to being of service to you.***

# Competitor Analysis: TGF- $\beta$ Inhibitors for Modulation of the Tumor Microenvironment

## Competitor Analysis: TGF- $\beta$ Inhibitors for Modulation of the Tumor Microenvironment

This industry report describes the competitive R&D landscape of specific TGF- $\beta$  inhibitors as well as TGF- $\beta$  receptor antagonists for modulation of the immunosuppressive tumor microenvironment as of December 2016.

The Competitor Analysis includes antibody-based inhibitors of transforming growth factor beta (TGF- $\beta$ ) or antagonists of TGF- $\beta$  receptors as well as small molecule inhibitors of TGF- $\beta$  receptor tyrosine kinase. The report also covers cancer vaccines and engineered T-cells incorporating TGF- $\beta$  inhibition and novel RNA-based molecules inhibiting the production of TGF- $\beta$ .

Purchase of the pdf report includes a 6-month online access to the data of the report and any updates since the publication date as well as the clinical and preclinical combination studies. Credentials to access the database will be sent by e-mail and allow online work with the project data to print or export an individual report.

The report includes a compilation of currently active projects in research and development of TGF- $\beta$ /RTK inhibitors and TGF- $\beta$ R antagonists for modulation of the tumor microenvironment. In addition, the report lists company-specific R&D pipelines of TGF- $\beta$  inhibitors. Competitor projects are listed in a tabular format providing information on:

- Drug Codes,
- Target / Mechanism of Action,
- Class of Compound,
- Company,
- Product Category,
- Indication,
- R&D Stage and
- additional comments with a hyperlink leading to the source of information.

### About Competitor Analysis Series:

The Competitor Analysis Series delivers NO-FRILLS, but concise information about the pipeline of R&D projects for targets, diseases, technologies and companies at low prices. The information is provided in a tabular format and fully referenced.
