Continuous Glucose Monitoring Systems - Medical Devices Pipeline Assessment, 2016

BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use How To Buy information on the last page of this document.

We look forward to being of service to you.

If you have bulk and/or recurring requirements, please get in touch - we can liaise with publishers to obtain sample pages and negotiate discounts on your behalf.

Continuous Glucose Monitoring Systems - Medical Devices Pipeline Assessment, 2016

Summary

GlobalData’s Medical Devices sector report, “Continuous Glucose Monitoring Systems - Medical Devices Pipeline Assessment, 2016” provides an overview of Continuous Glucose Monitoring Systems currently in pipeline stage. The report provides comprehensive information on the pipeline products with comparative analysis of the products at various stages of development. The report reviews major players involved in the pipeline product development. It also provides information about clinical trials in progress, which includes trial phase, trial status, trial start and end dates, and, the number of trials for the key Continuous Glucose Monitoring Systems pipeline products.

This report is prepared using data sourced from in-house databases, secondary and primary research by GlobalData’s team of industry experts.

*Note: Certain sections in the report may be removed or altered based on the availability and relevance of data in relation to the equipment type.

Scope

- Extensive coverage of the Continuous Glucose Monitoring Systems under development
- The report reviews details of major pipeline products which includes, product description, licensing and collaboration details and other developmental activities
- The report reviews the major players involved in the development of Continuous Glucose Monitoring Systems and list all their pipeline projects
- The coverage of pipeline products based on various stages of development ranging from Early Development to Approved / Issued stage
- The report provides key clinical trial data of ongoing trials specific to pipeline products
- Recent developments in the segment / industry

Reasons to buy

The report enables you to -

- Formulate significant competitor information, analysis, and insights to improve R&D strategies
- Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage
- Identify and understand important and diverse types of Continuous Glucose Monitoring Systems under development

- Develop market-entry and market expansion strategies

- Plan mergers and acquisitions effectively by identifying major players with the most promising pipeline

- In-depth analysis of the product’s current stage of development, territory and estimated launch date
