Interventional Radiology Market by Product (MRI System, Ultrasound Imaging System, CT Scanner, Angiography System), Procedures (Angiography, Angioplasty, Biopsy) & Application (Cardiology, Oncology, Urology & Nephrology) - Global Forecast to 2021

BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use *How To Buy* information on the last page of this document.

We look forward to being of service to you.

If you have bulk and/or recurring requirements, please get in touch - we can liaise with publishers to obtain sample pages and negotiate discounts on your behalf.

Interventional Radiology Market by Product (MRI System, Ultrasound Imaging System, CT Scanner, Angiography System), Procedures (Angiography, Angioplasty, Biopsy) & Application (Cardiology, Oncology, Urology & Nephrology) - Global Forecast to 2021

The global interventional radiology imaging market is expected to reach USD 23.50 billion by 2021 from USD 16.99 billion in 2016, at a CAGR of 6.7%. The market is broadly classified into product, procedures, and application.

On the basis of product, the market is segmented into angiography systems, fluoroscopy systems, CT scanners, ultrasound-imaging systems, MRI system, and other devices (C-arm, contrast media injectors, & imaging catheter guidewires). The MRI system segment is estimated to account for the largest share of the market in 2016. Factors such as technological advancements and product launches are driving the growth of this segment.

Based on procedure, the market is segmented into angiography, angioplasty, embolization, thrombolysis, vertebroplasty, nephrostomy, and other procedures (biliary drainage, fallopian tube recanalization, cholecystectomy, and carotid-cavernous fistula). The angiography segment is projected to witness the highest growth in this market due to increasing prevalence of cardiovascular diseases and the growing demand for minimally invasive procedures.

By applications, the market is segmented into cardiology, oncology, urology & nephrology, gastroenterology, and other applications (orthopedics, neurology, and gynecology). The oncology segment is projected to witness the highest growth in this market due to increase in the incidence of cancer and rising demand for minimally invasive procedures.

Geographically, the market is dominated by North America, followed by Europe, Asia, and the Rest of the World (RoW). Growth in the North American region is primarily driven by the increase in the prevalence and incidence of chronic diseases and the aging population.

The key players in the market include GE Healthcare (General Electric Company) (U.K.), Siemens Healthcare GmbH (Siemens AG) (Germany), Koninklijke Philips N.V. (The Netherlands), Toshiba Medical Systems Corporation (Toshiba Corporation) (Japan), Hitachi Medical Corporation (Hitachi Ltd.) (Japan), Carestream Health, Inc. (U.S.), Esaote S.p.A (Italy), Hologic, Inc. (U.S.), Fujifilm Corporation (Japan), Samsung Medison (South Korea), and Shimadzu Corporation (Japan).

Research Coverage:

Apart from comprehensive geographic and product analysis and market sizing, the report also provides a competitive landscape that covers the growth strategies adopted by industry players over the last three years. In addition, the company profiles comprise the product portfolios, developments, and strategies adopted by the market players to maintain and increase their shares in the market. The abovementioned market research data, current market size, and forecast of the future trends will help market players and new entrants to make the necessary decisions regarding product offerings, geographic focus, change in strategic approach, and levels of output to remain successful in the market.

Reasons to Buy the Report:

<https://www.bioportfolio.co.uk/product/47331>
pdb@bioportfolio.co.uk to order

This report will enable both established firms as well as new entrants/smaller firms to gauge the pulse of the market, which in turn will help these firms garner greater market shares. Firms purchasing the report can use any one or a combination of the below-mentioned five strategies to strengthen their market shares.

The report provides insights on the following pointers:

- **Market Penetration:** Comprehensive information on the product portfolios of the top players in the interventional radiology imaging market. The report analyses the interventional radiology imaging market: by product, by procedure, and by application.
- **Product Development/Innovation:** Detailed insights on the upcoming technologies, R&D activities, and product launches in the interventional radiology imaging market
- **Competitive Assessment:** In-depth assessment of the market strategies, geographic and business segments, and product portfolios of the leading players in the interventional radiology imaging market
- **Market Development:** Comprehensive information about emerging markets. This report analyzes the market for various interventional radiology imaging products across geographies
- **Market Diversification:** Exhaustive information about new products, untapped geographies, recent developments, and investments in the interventional radiology imaging market
