Drug Discovery Informatics - Global Market Outlook (2015-2022)

BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use *How To Buy* information on the last page of this document.

We look forward to being of service to you.

If you have bulk and/or recurring requirements, please get in touch - we can liaise with publishers to obtain sample pages and negotiate discounts on your behalf.

Drug Discovery Informatics - Global Market Outlook (2015-2022)

According to Statistics MRC, the Global Drug Discovery Informatics Market is accounted for \$1.91 billion in 2015 and is expected to reach \$6.94 billion by 2022 growing at a CAGR of 17.5% from 2015 to 2022. The rising demand for computational technology is the primary factor favouring the market growth. Furthermore, Drug discovery industry and rising number of technologically advanced products are the key drivers for the Drug Discovery Informatics market. However, Lack of information technology and critical attributes of data evaluation are limiting the market growth. The recent trends in Drug Discovery Informatics are considerable shift observed from traditional in-vitro drug development to computer aided drug designing, as costly failures of late drug development increases the use of in-silico models for early ADME/Toxicity screening.

Sequence analysis platforms services accounted the largest revenue share and are expected to continue and dominate the market over the forecast period. North America commanded the largest share driven by the increasing demand for computational technology. However, Asia Pacific is projected to register the fastest growth over the forecast period owing to technological developments in the software and drug nano technology fields carried out in the developing economies.

Some of the key players in the market include ChemAxon, GVK Biosciences, Jubilant Biosys, Selvita, Certara, Infosys, Albany Molecular Research Inc., BoehringerIngelheim GmbH,, DiscoverX, Charles River Laboratories, Covance, Collaborative Drug Discovery Inc., Novo Informatics, UCB and Evotec.

Modes Covered:

- In-house Informatics
- Outsourced Informatics

Services Covered:

- Molecular Modelling
- Sequence Analysis Platforms
- Docking
- Clinical Trial Data Management
- Other Services

Regions Covered:

- North America
 - o US
 - o Canada
 - o Mexico
- Europe
 - o Germany
 - o France

- o Italy
- o UK
- o Spain
- o Rest of Europe
- Asia Pacific
- o Japan
- o China
- o India
- o Australia
- o New Zealand
- o Rest of Asia Pacific
- Rest of the World
- o Middle East
- o Brazil
- o Argentina
- o South Africa
- o Egypt

What our report offers:

- Market share assessments for the regional and country level segments
- Market share analysis of the top industry players
- Strategic recommendations for the new entrants
- Market forecasts for a minimum of 7 years of all the mentioned segments, sub segments and the regional markets
- Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments
- Supply chain trends mapping the latest technological advancements

Global Market Research and Corporate Data

We offer wide spectrum of research and consulting services with in-depth knowledge of different industries. We are known for customized research services, consulting services and Full Time Equivalent (FTE) services in the research world. We explore the market trends and draw our insights with valid assessments and analytical views. We use advanced techniques and tools among the quantitative and qualitative methodologies to identify the market trends. Our research reports and publications are routed to help our clients to design their business models and enhance their business growth in the competitive market scenario. We have a strong team with hand-picked consultants including project managers, implementers, industry experts, researchers, research evaluators and analysts with years of experience in delivering the complex projects.

We have core research team with research analysts across the verticals of industry segments to serve our varied customers such as technology suppliers, manufacturers, distributors, end users, consulting companies, investment firms and research institutes. We ensure that our research reports, white papers, policy briefs provide result oriented findings and recommendations. Our research reports help you to make better decisions in building the organization presence in global scenario. Our consultancy services offer you with highly qualified professional research team to match your research needs. We are in the process of addressing the challenges of our clients and able to deliver the quality outputs to meet their business objectives and goals in a potential way. We invest more in building our teams and enhance our client relationships across the geographies where we work.
