Lung Cancer Surgery Market: By Type (Thoracotomy, Minimally Invasive Procedures), By End-User (Hospitals, Adult Lung Cancer Surgery Centers, Ambulatory Surgical Centers) & By Region-Forecast (2016-2021)

Lung cancer is the most common type of cancer prevailing across the globe. According to WHO, lung cancer is expected to be more prominent in the underdeveloped world due to an increase in the use of tobacco products; tobacco is the primary cause of around 80% of all lung cancers. According to WHO, lung cancer cases in developing economies is expected to reach 2,530,820 by 2025. Globally increasing awareness about cancers and about available treatments coupled with favourable reimbursement scenario in the developed countries favors the market for lung cancer surgery. These two factors are expected to be the key growth drivers for the lung cancer surgery market during the period of study.

Lung Cancer Surgery Market

Geographically North America dominated global lung cancer surgery market driven by best in the class healthcare infrastructure, advanced facilities and awareness and higher spending by the citizens towards healthcare expenditure. North America was followed by Europe and Asia-Pacific as second and third largest market for lung cancer surgery market. Asia Pacific is projected to have fastest growth, owing to rapidly increasing healthcare infrastructure, increased spending, government initiatives and increasing awareness amongst population, and growing medical tourism industry in developing nations such as China, and India in this region.
