Immunohistochemistry Market: By Product (Antibody, Reagent, Kits, Slide Staining System, Tissue Microarray), By Application (Diagnostics (Cancer, Cardiovascular, Diabetes, Autoimmune, Infectious Diseases) & Drug Testing), By End User (Hospital, Research Institute) & By Geography - Forecast (2017-2022)

BioPortfolio has been marketing business and market research reports from selected publishers for over fifteen years. BioPortfolio offers a personal service to our customers with dedicated research managers who will work with you to source the best report for your needs. Based in the UK, BioPortfolio is well positioned to coordinate our customers' orders sourced from over 50 global report publishers.

We are pleased to present details of this report to assist your buying decision and administrative process. You will find easy-to-use *How To Buy* information on the last page of this document.

We look forward to being of service to you.

If you have bulk and/or recurring requirements, please get in touch - we can liaise with publishers to obtain sample pages and negotiate discounts on your behalf.

Immunohistochemistry Market: By Product (Antibody, Reagent, Kits, Slide Staining System, Tissue Microarray), By Application (Diagnostics (Cancer, Cardiovascular, Diabetes, Autoimmune, Infectious Diseases) & Drug Testing), By End User (Hospital, Research Institute) & By Geography - Forecast (2017-2022)

Immunohistochemistry (IHC) can be defined as the process of selectively imaging antigens such as proteins in cells of a tissue section by exploiting the principle of antibodies binding specifically to antigens in biological tissues. This process is mainly used for the detection of abnormal cells such as cancerous cells in the tissue. Globally increasing awareness about cancer and developing healthcare infrastructure in emerging economies is expected to remain key growth driver during the period of study.

This report identifies the Immunohistochemistry Market size in for the year 2015-2017 and forecast of the same for year 2022. It also highlights the potential growth opportunities in the coming years, while also reviewing the market drivers, restraints, growth indicators, challenges, market dynamics, competitive landscape, and other key aspects with respect to Immunohistochemistry Market.

Geographically North America dominated the Immunohistochemistry Market owing to well developed & established healthcare industry, higher spending on healthcare and higher awareness about cancer amongst its citizens. North America was followed by Europe and Asia-Pacific as the second and third largest markets for immunohistochemistry. However, it is estimated that Asia-Pacific will remain as the fastest growing market for immunohistochemistry during the period of study driven by infrastructural development in healthcare sector, growth in the geriatric population, increasing prevalence and awareness of cancer, growing access to medical facilities and growing disposable incomes in the emerging economies such as India, China and few others.

This report segments Immunohistochemistry Market on the basis of product, application, end user and regional market as follows:

On the basis of product this report on Immunohistochemistry Market is segmented as follows, covering all major product type in the immunohistochemistry as follows: Antibody, Equipment, Reagents and Kits

This report on immunohistochemistry also covers in detail various applications of immunohistochemistry, some of the major applications covered in the report are Diagnostics and Drug Testing

This report on immunohistochemistry also covers in detail major end users of immunohistochemistry, some of the major end users covered in the report are Hospitals and Diagnostic Laboratories, Research Institutes, Other End Users

This report on global immunohistochemistry also covers in detail various applications of immunohistochemistry, some of the major application covered in the report are Clinical documentation, E-Prescribing, Order entry (CPOE), Patient tracking, Resource tracking and management, Other applications

This report on immunohistochemistry has been further segmented into major regions, which includes detailed analysis of each region such as: North America, Europe, Asia-Pacific (APAC) and Rest of the World (RoW) covering all the major country level markets in each of the region

Sample Companies Profiled in this Report are:

F. Hoffmann-LA Roche AG

Danaher Corporation

Agilent Technologies, Inc.

Thermo Fisher Scientific Inc.

Bio-Rad Laboratories, Inc.

30+.
